STORMWATER MANAGEMENT FACILITY CERTIFICATION STATEMENT

PROJECT NAME _____

Based upon construction-period and post-construction observation of project stormwater management facilities, I certify that all structural and non-structural stormwater management facilities are in general conformance with the requirements and specifications of the facilities as described in the approved construction drawings, approved design documents, manufacturers installation instructions and/or any approved modifications, and that the facilities should function as intended by the original design.

Furthermore, I have observed the stormwater runoff patterns on the site, including the disposition of roof drainage, and it appears that drainage areas to constructed facilities are in general conformance with the approved plans.

I certify the attached, sealed Record Drawings reflect the final, installed facilities. Any deviations from the approved plans have been adequately marked on the record drawings. I further certify that the Owner/Developer has been provided a copy of these drawings and has been advised of their responsibility to transfer such drawings to the party or parties responsible for the maintenance of the facilities per the Stormwater Management Inspection & Maintenance Agreement.
